

404600 to 404723—Continued

404718 and 404719. *STYLOSANTHES HUMILIS* HBK. Fabaceae.

404718. 230. On Route 1, 241 km northwest of Encarnacion. Low, prostrate plant with few leaves. Heavily grazed in pasture. Wild.

404719. 270. On Route 2, 145 km west of Rio Parana. Semi-erect plant 15 cm high, few leaves. Growing in heavily grazed area. Wild.

404720. *TRICHLORIS CRINITA* (Lag.) Parodi Poaceae.

256. Near entrance to Estacion Experimental Ganadera. Bunchgrass 0.9 m high, leaves 38 cm. May have value as ornamental plant. Wild.

404721. Undetermined.

240. Desarrollo Ganadero—Estancia "Barrerito", 18 km east of Caapucu. Pods 2.5 cm long. Similar to vetch in leaf shape. Growing in native pasture at Station. Wild.

404722. Undetermined.

252. Chaco Region, entrance to Estacion Estacion Experimental Ganadera. Lily-like plant with inflorescence 1.5 m high. Leaves 1.2 m, flowers yellow. Growing in poorly drained area. Local name "Canna lily". Wild.

404723. Undetermined.

564. Experiment Station, 10 km northwest of Filadelfia. Erect, branching legume 0.6 to 0.9 m high. Stems hard and tough, pods 2.5 m long. Produces many seed. Wild.

404724. *SALIX SACHALINENSIS* Schmidt Salicaceae.

From Japan. Cuttings presented by Yoshisuke Maki, Hokkaido National Agricultural Experiment Station, Hitsujiga-oka, Toyohira-Ku, Sapporo. Received November 10, 1975.

Fast growing bush type willow, widely adapted in Japan. Highly tolerant to cold and drought.

404725 to 404731. *ARACHIS HYPOGAEA* L. Fabaceae. **Peanut.**

From Peru. Seed collected August 1975 by Brent Berline, Anthropologist, Language-Behavior Research Laboratory, University of California, Berkeley, California. Received September 24, 1975.

404725. 'Ipak duse'. Aguaruna Indian, near junction of Cenepa River and Huampami Creek, north central Peru. Testa color pink to reddish.

404726. 'Ipak duse'. Aguaruna Indian, near junction of Cenepa River and Huampami Creek, north central Peru. Testa color variegated dark to light brown.

404727. 'Kun duse'. Aguaruna Indian, near junction of Cenepa River and Huampami Creek, north central Peru. Testa color "white" or light flesh.

404728. 'Mun duse'. Aguaruna Indian, near junction of Cenepa River and Huampami Creek, north central Peru. Basic testa color light tan to white, with broad purple-wine streaks.

404729. 'Mun duse'. Aguaruna Indian, near junction of Cenepa River and Huampami Creek, north central Peru. Basic testa color light tan to white, with purple dotted dashes.

404730. 'Mun duse'. Aguaruna Indian, near junction of Cenepa River and Huampami Creek, north central Peru. Basic testa color dark to light brown, with broad purple streaks.

404731. 'Shuwin duse'. Aguaruna Indian, near junction of Cenepa River and Huampami Creek, north central Peru. Testa color dark red to purple.
